

*Driven by data.  
Navigated by humans.*

Our mission is to harness project data to help people make the best decisions.

*Be part of  
changing  
the industry*

Our teams are focused on delivering projects in a data-driven, value-led manner.

**About Mudano**

Mudano is developing the autonomous project.

We capture data on projects – such as daily tasks, meeting notes, team sentiment, resource information and project progress – and use it to guide better decision-making. Using machine learning we can predict the path of a project, helping teams to foresee issues, improve productivity and deliver efficiently.

**We call this Delivery Science™**

We are building a unique software package which integrates project management tooling with data science and analytics to support teams working on large change programmes to make better project decisions and predict upcoming issues through data insight, visualisation, predictive analytics and real time reporting.

We are starting from the ground up to build a system for all project stakeholders and ensuring that at every interaction value is added, insight is communicated and efficiency is gained. There's no use gathering

information about projects if the capture of data becomes an overhead in itself.

Data is core to our business too. By analysing data from projects, our platform will highlight future issues, predict the probability of slippage and provide real sentiment analysis on project delivery.

The system is a cloud based collaboration tool, built using cutting edge open source technologies.

*Different  
works here*

**What Will You Be Doing?**

You will be working closely with our project teams and clients to enhance data quality and ensuring the data is fit-for-purpose, and supports client requirements. You will be responsible for all activity relating to data quality improvement and working with the teams to provide and embed robust data quality KPIs and other measures including DQ reporting.

- / Ability to understand via interview business processes & controls
- / Good with details & be able to produce good documentation
- / VBA Automation
- / Collibra data governance
- / Data Quality risk modelling
- / Good knowledge of BCBS 239 principles

**Required Skills and Experience**

- / Ability to understand via interview business processes & controls
- / Be able to make independent assessment how strong those controls are and make recommendations
- / Be able to interact with business stakeholders & senior executive to share our findings

*Love what  
you do*

**Benefits and compensation**

- / Salary 40k - 50k depending on skills, experience and qualifications
- / Flexible holiday plan of 25 days annual leave (plus bank holidays)
- / Comprehensive benefit package including private medical, wellbeing cover, discounted gym membership, and life insurance
- / Pension scheme with 3% employer contribution
- / Entry into our company stock option scheme
- / Individual training budget and career mentoring
- / 1% club – small benefits that make a big difference (i.e. monthly audible/book allowance, UBER for business)
- / Edgy head-office in start-up incubator (including Thursday beer hours, networking, TED style talks, and unlimited tea/coffee and fruit)
- / Choice of Mac, Windows, or Linux dual-boot and tablet
- / Flexible working
