

*Driven by data.  
Navigated by humans.*

Our mission is to harness project data to help people make the best decisions.

**About Mudano**

Mudano is developing the autonomous project.

We capture data on projects – such as daily tasks, meeting notes, team sentiment, resource information and project progress – and use it to guide better decision-making. Using machine learning we can predict the path of a project, helping teams to foresee issues, improve productivity and deliver efficiently.

**We call this Delivery Science™**

*Be part of  
changing  
the industry*

Our teams are focused on delivering projects in a data-driven, value-led manner.

We are building a unique software package which integrates project management tooling with data science and analytics to support teams working on large change programmes to make better project decisions and predict upcoming issues through data insight, visualisation, predictive analytics and real time reporting.

We are starting from the ground up to build a system for all project stakeholders and ensuring that at every interaction value is added, insight is communicated and efficiency is gained. There's no use gathering

information about projects if the capture of data becomes an overhead in itself.

Data is core to our business too. By analysing data from projects, our platform will highlight future issues, predict the probability of slippage and provide real sentiment analysis on project delivery.

The system is a cloud based collaboration tool, built using cutting edge open source technologies.

*Different  
works here*

**What Will You Be Doing?**

You will be working closely with our project teams and clients to enhance data quality and ensuring the data is fit-for-purpose, and supports client requirements. You will be responsible for all activity relating to data quality improvement and working with the teams to provide and embed robust data quality KPIs and other measures including DQ reporting.

Informatica DQ or equivalent)

/ Be able to understanding data and what good (DQ) look like then translate those into documentation. Then work with IT to implement those checks

/ Appreciate regulatory projects such as IFRS9, CRDIV, Solvency II or BCBS239

/ Good stakeholder management skills, be able to translate requirements to tech specs

/ Ideally have experience of migration of DQ tools

**Desired Skills and Experience**

/ Previous experience in implementing/rolling out DQ checking & governance using an enterprise DQ Tools (such as Syncsort Trillium, Ataccama, Information Builder,

*Love what  
you do*

**Benefits and compensation**

/ Salary 50k - 70k depending on skills, experience and qualifications

/ Flexible holiday plan of 25 days annual leave (plus bank holidays)

/ Comprehensive benefit package including private medical, wellbeing cover, discounted gym membership, and life insurance

/ Pension scheme with 3% employer contribution

/ Entry into our company stock option scheme

/ Individual training budget and career mentoring

/ 1% club – small benefits that make a big difference (i.e. monthly audible/book allowance, UBER for business)

/ Edgy head-office in start-up incubator (including Thursday beer hours, networking, TED style talks, and unlimited tea/coffee and fruit)

/ Choice of Mac, Windows, or Linux dual-boot and tablet

/ Flexible working
