

*Driven by data.
Navigated by humans.*

Our mission is to harness project data to help people make the best decisions.

About Mudano

Mudano is developing the autonomous project by applying scientific techniques to project delivery.

We believe projects should be designed to increase business value and remove waste by utilising project data to empower teams and guide human behaviour. We apply data-led decision making techniques to support strategic decisions and optimise day to day execution. We enable this by a set of principles supported by a continually evolving knowledge base that consists of training, method, data, software and insights.

We call this Delivery Science™

*Be part of
changing
the industry*

Our teams are focused on delivering projects in a data-driven, value-led manner.

We are building a unique software package which integrates project management tooling with data science and analytics to support teams working on large change programmes to make better project decisions and predict upcoming issues through data insight, visualisation, predictive analytics and real time reporting.

We are starting from the ground up to build a system for all project stakeholders and ensuring that at every interaction value is added, insight is communicated and efficiency is gained. There's no use gathering

information about projects if the capture of data becomes an overhead in itself.

Data is core to our business too. By analysing data from projects, our platform will highlight future issues, predict the probability of slippage and provide real sentiment analysis on project delivery.

The system is a cloud based collaboration tool, built using cutting edge open source technologies.

*Different
works here*

What will you be doing?

You will be part of a growing team consisting of experienced consultants creating branded content for all Mudano Delivery Science assets.

As part of this role, you will be designing (from wireframe to hifi) info-graphics, illustrations and graphical content to represent storyboards explaining complex processes, concepts and bringing solutions to life.

Initially, you will be owning and updating our knowledge base.

Desired skills and experience

- / Experience of creating unique solutions using Adobe Creative Suite, specifically Illustrator and InDesign
- / Experience of end to end design process from requirements to final product through agile delivery methods
- / Ideal candidate would also be able to assist in information design through effective data visualisation of complex datasets
- / Excellent stakeholder management skills

*Love what
you do*

Benefits and compensation

- / Salary 22k - 27k Pro Rata (depending on skills, experience and qualifications)
- / Flexible holiday plan of 25 days annual leave (plus bank holidays)
- / Comprehensive benefit package including private medical, wellbeing cover, discounted gym membership, and life insurance
- / Pension scheme with 3% employer contribution
- / Entry into our company stock option scheme
- / Individual training budget and career mentoring
- / 1% club – small benefits that make a big difference (i.e. monthly audible/book allowance, UBER for business)
- / Edgy head-office in start-up incubator (including Thursday beer hours, networking, TED style talks, and unlimited tea/coffee and fruit)
- / Choice of Mac, Windows, or Linux dual-boot and tablet
- / Flexible working
