

# SOLUTION ARCHITECT

LONDON (WITH TRAVEL)

# MUDANO

WASTE LESS. DO MORE.

## *Driven by data. Navigated by humans.*

Our mission is to harness project data to help people make the best decisions.

### **About Mudano**

Mudano is developing the autonomous project.

We capture data on projects – such as daily tasks, meeting notes, team sentiment, resource information and project progress – and use it to guide better decision-making. Using machine learning we can predict the path of a project, helping teams to foresee issues, improve productivity and deliver efficiently.

### **We call this Delivery Science™**

## *Be part of changing the industry*

Our client-facing teams are focused on delivering projects in a data-driven, value-led manner.

### **Job description and duties**

We are looking for Solution Architects who are ambitious, motivated, innovative, and organised.

- / Lead large scale data, system integration and business transformation projects for our clients
- / Cultivate and use your knowledge of leading edge products and technology, coupled with industry and business skills, to influence clients
- / The primary focus is on developing solutions from the customer's perspective
- / The ability to glean customer pain

points and gains is required

- / Assist in mapping out customers' needs from a technical point of view
- / Deliver solutions in response to specific business opportunities
- / Specify and design end to end solutions considering the architecture for systems, data management, infrastructure, integration etc.
- / Select appropriate solution design standards, methods and tools, in line with the IT architecture strategy. Review existing system designs to ensure a selection of technology and architectures are applied effectively

## *Different works here*

If you've spent your career building toolkits to make things more efficient, you'll find kindred spirits at Mudano.

### **Key skills and experience**

- / 5+ years work experience in full systems development as an architect within a consultancy/SI (FS required)
- / Previous experience in solution architecture design
- / Understanding of industry trends, technologies and best practices
- / Relevant IT accreditations or certifications, particularly architecture related
- / Strong understanding in relational data

structures, data warehousing concepts and practices

- / Experience in management of database and repository design, infrastructure, integration, network and information security
- / Advance knowledge of application development framework, architecture and design standards
- / Understanding of Software Development Life Cycle (SDLC) and project management principles

## *We believe in win-win*

You'll have opportunities to challenge yourself and rapidly grow your career.

### **Benefits and compensation**

- / Salary between £50k and £80k based on experience and skills
- / 25 days annual leave (plus bank holidays)
- / Comprehensive benefit package including private medical, wellbeing cover, discounted gym membership, and life insurance
- / Pension scheme with 3% employer contribution
- / Entry into our company stock option scheme
- / Individual training budget and career mentoring
- / 1% club – small benefits requested by the team that make a big difference (e.g. monthly book allowance, UBER for business)
- / Edgy head-office in start-up incubator (including Thursday beer hours, networking, TED style talks, and unlimited tea/coffee and fruit)
- / State of the art IT equipment including touchscreen laptop and tablet
- / Flexible working
