

*Driven by data.
Navigated by humans.*

Our mission is to harness project data to help people make the best decisions.

About Mudano

Mudano is developing the autonomous project.

We capture data on projects – such as daily tasks, meeting notes, team sentiment, resource information and project progress – and use it to guide better decision-making. Using machine learning we can predict the path of a project, helping teams to foresee issues, improve productivity and deliver efficiently.

We call this Delivery Science™

*Be part of
changing
the industry*

Our client-facing teams are focused on delivering projects in a data-driven, value-led manner.

What are we looking for?

We are looking for Data Viz Consultants with at least 3 years of relevant experience to work our client teams to drive-out analytical requirements through prototyping and visualization.

The ideal candidate must have a passion for beautiful visualisation and data storytelling, and will have experience in the following:

/ Developing reporting and data visualisations for clients in the form of advanced dashboards and workbooks

- / Understanding infrastructure requirements and best practices to support a Tableau deployment
- / Developing and documenting technical
- / Architecture, system design and other technical aspects
- / Be able to provide examples of producing impactful visualizations
- / An Tableau Public profile showcasing your work and examples

*Different
works here*

If you've spent your career building toolkits to make things more efficient, you'll find kindred spirits at Mudano.

Key skills and experience

- / 3+ years' work experience in data Engineering
- / 3+ years of experience creating static and interactive visualizations, reports, and workbooks in Tableau
- / Ability to write SQL in order to pull, join, and aggregate data in order to create views for Tableau
- / Ability to work closely with users to understand the business purpose the report serves and identify/fix bugs
- / Self-starter and self-directed with some level of inquisitiveness to query and test results
- / Experience using Qlikview or Power BI would be advantageous

*We believe
in win-win*

You'll have opportunities to challenge yourself and rapidly grow your career.

Benefits and compensation

- / Salary between £40k and £60k based on experience and skills
- / 25 days annual leave (plus 8 bank holidays)
- / Comprehensive benefit package including private medical, wellbeing cover, discounted gym membership, and life insurance
- / Pension scheme with 3% employer contribution
- / Entry into our company stock option scheme
- / Individual training budget and career mentoring
- / 1% club – small benefits requested by the team that make a big difference (e.g. monthly book allowance, UBER for business)
- / Edgy head-office in start-up incubator (including Thursday beer hours, networking, TED style talks, and unlimited tea/coffee and fruit)
- / State of the art IT equipment including touchscreen laptop and tablet
- / Flexible working
