

CUSTOMER FACING DATA ENGINEER

LONDON (WITH TRAVEL)

MUDANO

WASTE LESS. DO MORE.

We are determined to transform a wasteful industry

An industry that's stuck in its ways. We only work with people as ambitious and driven as we are. At Mudano there's no time to kick back, stick your feet up and look out of the window. We're on a mission to transform an entire industry. It's a big challenge. But what doesn't challenge you, doesn't change you. People with this drive and fire are our life blood. They aspire to do and be more. That's why our acceptance rate is even tougher than Harvard. We only want the best, and people who believe in values that will realise a vision.

Our people. Our practitioners. Focused on project efficiency and business value delivery. Passionate about removing bias and guesswork and replacing it with informed, objective decision-making.

Build on what you can do. Realise the potential you have.

We are looking for authentic and committed Data Engineers to design solutions for effective applications underpinned by your understanding of data technologies, tools and languages.

Job description and duties

- / You will be integrating and transforming data sources to produce and test new products
- / Your understanding of code control and deployment will support continuous delivery of production applications
- / You will be implementing complex solutions ranging from batch to streaming architectures, cloud on-premise implementations, simple cron based batch processes to event driven and streaming architectures
- / You will be working on projects at our customer's offices (travel required) as well as internal developments in HQ
- / Additionally you may be translating data to insights that enable the business to make decisions as well as using your data visualisations to tell a compelling story with data that makes complex topics understandable

Key skills and experience

- / 3+ years' work experience in Data Engineering
- / Strong SQL knowledge, specific knowledge of Postgres would be valuable
- / Alternatively you will have strong Python (or similar) experience in data ingestion and processing pipelines
- / A strong understanding of data modeling, data structures, databases, and ETL processes
- / An in-depth understanding of large scale data sets, including both structured and unstructured data
- / Must be proactive, highly analytical, and detail-oriented with strong time management skills
- / Strong communication skills, including prioritising, problem solving and interpersonal relationship building
- / An ability to understand and articulate requirements to technical and non-technical audiences
- / Experience with Hadoop and/or Spark would be a bonus

Behaviours that will move frontiers

Imagine with intelligence

We're a data company that is doing things nobody has done before. That takes sharp and agile minds. Minds that can make the leap from the known to the unknown; that questions what's possible. Think from first principles and dare to go somewhere new.

Enjoy uncomfortable

Transforming an entire industry requires desire, energy, perseverance and a restlessness to push the boundaries of what's possible. While challenging the status quo can be scary, the results are worth it.

Be clever and concise

We move fast. To keep momentum, we need to simplify challenges into concise statements and efficient dialogues.

Apply ethics

We work in a transparent manner. If we finish a project ahead of time, we'll call time on our fees that day. In an industry used to wasting millions, it takes many clients by shock.

Be your authentic self

We don't want clones. We want knowledge-age thinking. It doesn't matter if you prefer suits or jeans, if you hold a baby or a briefcase. You'll only be the best version of yourself when you are yourself.

Science eats opinion

Apply a little science; get a different result. A better result. Find the data and run your own experiments. That's the Mudano way.

Farewell to the mundane

Mudano is a collective of unique individuals but with a common set of beliefs, behaviours and values. Culture is how we work together. Easy to experience, harder to pin down and define in words. It is inclusive and it is diverse. Our benefits and policies are designed for each person to integrate their work and life in a way that is right for them, as well as provide extensive support for career development, whatever that path may be.

Want more flexibility? Talk to us and we'll see if together we can build a better business world.

Benefits and compensation

- / Generous personal training budget for your professional development
- / Individual coaching programme
- / Monthly book allowance
- / Comprehensive benefit package including private medical, wellbeing cover, discounted gym membership, and group life insurance
- / 24-hour counselling
- / Good work/life integration
- / Salary £40k to £60k based on experience and skills
- / 25 days annual leave
- / Pension scheme with 3% employer contribution
- / Entry into our company stock option scheme
- / Head-office in start-up incubator (including Thursday social hours, networking, TED style talks, and unlimited tea/coffee and fruit)
