

# TEST ENGINEER

EDINBURGH

# MUDANO

WASTE LESS. DO MORE.

*We are determined to transform a wasteful industry*

An industry that's stuck in its ways. We only work with people as ambitious and driven as we are. At Mudano we're on a mission to transform an entire industry. It's a big challenge. But what doesn't challenge you, doesn't change you. People with this drive and fire are our life blood. They aspire to do and be more.

Our people. Our practitioners. Focused on project efficiency and business value delivery. Passionate about removing bias and guesswork and replacing it with informed, objective decision-making.

Our mission is to build the autonomous project. Sharktower is our propriety platform that uses tooling, data and algorithms to confidently predict the most efficient route to achieving business value in large scale change delivery.

*Build on what you can do. Realise the potential you have.*

We are at an exciting stage of our journey with an ambitious five-year plan for further scaling our product proposition in different markets. We are looking for an experienced and ambitious Test Engineer to help us on this journey. We are looking for a passionate tester to work in a talented team within a fast paced and innovate environment. You will have a dedication for the latest technologies, relish a very agile environment and are looking for genuine responsibility to deliver cutting edge solutions.

## Your day to day role will involve:

- / You will work with an agile team, assist Scrum team with sprint planning, test design, test execution, defect analysis/root cause investigation & reporting
- / Help identify, plan and execute non-functional testing requirements
- / You will work closely with Product Owner and Technical Architect to agree test requirements for the feature - Core User Journeys and ensure acceptance criteria are accurate, clear and well defined
- / You will write well defined Exploratory and End-to-End Automated tests and share feedback/report
- / You will help the development teams in writing automated API integration test and also Component UI (storybook) test

## Required skills and experience:

- / Automation testing using libraries such as WebdriverIO, Selenium, Jest, Karma and Mocha
- / Ability to review the developer PR if needed
- / Strong understanding of reporting tools including Jira, Allure and Github
- / Experience using Docker and Browserstack
- / JavaScript coding experience (full stack with NodeJS/ReactJS)
- / Performance testing: Artillery or Load Impact
- / Excellent written and verbal communication skills

## Behaviours that will move frontiers

### Imagine with intelligence

We're a data company that is doing things nobody has done before. That takes sharp and agile minds. Minds that can make the leap from the known to the unknown; that questions what's possible. Think from first principles and dare to go somewhere new.

### Enjoy uncomfortable

Transforming an entire industry requires desire, energy, perseverance and a restlessness to push the boundaries of what's possible. While challenging the status quo can be scary, the results are worth it.

### Be clever and concise

We move fast. To keep momentum, we need to simplify challenges into concise statements and efficient dialogues.

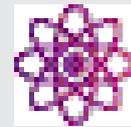

### Apply ethics

We work in a transparent manner. If we finish a project ahead of time, we'll call time on our fees that day. In an industry used to wasting millions, it takes many clients by shock.

### Be your authentic self

We don't want clones. We want knowledge-age thinking. It doesn't matter if you prefer suits or jeans, if you hold a baby or a briefcase. You'll only be the best version of yourself when you are yourself.

### Science eats opinion

Apply a little science; get a different result. A better result. Find the data and run your own experiments. That's the Mudano way.

## Farewell to the mundane

Mudano is a collective of unique individuals but with a common set of beliefs, behaviours and values. Culture is how we work together. Easy to experience, harder to pin down and define in words. It is inclusive and it is diverse. Our benefits and policies are designed for each person to integrate their work and life in a way that is right for them, as well as provide extensive support for career development, whatever that path may be.

Want more flexibility? Talk to us and we'll see if together we can build a better business world.

## Benefits and compensation

- / Generous personal training budget for your professional development
- / Comprehensive coaching programme
- / Monthly book allowance
- / Comprehensive benefit package including private medical, wellbeing cover, discounted gym membership, and group life insurance
- / 24-hour counselling
- / Good work/life balance
- / Salary between £35-45,000 (depending on experience)
- / 25 days' annual leave
- / Pension scheme with 3% employer contribution
- / Entry into our company stock option scheme
- / Head-office in start-up incubator (including Thursday social hours, networking, TED style talks, and unlimited tea/coffee and fruit)
