

We are determined to transform a wasteful industry

An industry that's stuck in its ways. We only work with people as ambitious and driven as we are. At Mudano there's no time to kick back, stick your feet up and look out of the window. We're on a mission to transform an entire industry. It's a big challenge. But what doesn't challenge you, doesn't change you. People with this drive and fire are our life blood. They aspire to do and be more. That's why our acceptance rate is even tougher than Harvard. We only want the best, and people who believe in values that will realise a vision.

Our people. Our practitioners. Focused on project efficiency and business value delivery. Passionate about removing bias and guesswork and replacing it with informed, objective decision-making.

Build on what you can do. Realise the potential you have.

We are looking for an architect who share our passion in the way projects are delivered by making data-led decisions. We are looking for you to increase business value, remove waste from change projects by utilising project data to empower teams and guide human behaviour

Job description and duties:

You will be delivering large scale data, system integration and business transformation projects for our customers.

- / You will be working on projects including: Data Strategy, Data Analytics, Applied Machine Learning, Regulatory compliance, or Data transformation
- / You will lead and engage with clients to identify opportunities by providing industry insights
- / You will articulate and design broad range of solution architecture patterns and address client challenges through examples and prototypes
- / You will shape the delivery & implementation roadmaps to deliver data and technology solutions working with delivery managers
- / You will support in sales activities in a pre-sales architect capacity and provide advice on architecture best practises
- / You will produce architecture blueprints, technical design patterns & solution delivery roadmaps that can inform delivery & execution

Required skills and experience:

- / 10+ years' work experience with an extensive technical and data background as a delivery/project manager within a consultancy
- / 6+ years experience consulting with FS clients
- / A deep understanding and hands-on knowledge in Data Strategy, Data Analytics, Applied Machine Learning, Regulatory compliance, or Data transformation
- / Experience of identifying challenges faced by FS organisations (e.g. regulations, adoption of technology, AML, fraud & KYC, scaling machine learning solutions etc
- / Practical understanding of business use cases that are enabled by different data solution architectures
- / Ability to leaf technical and non-technical teams to ensure business value is delivered
- / Track record of chairing design forums/working groups with senior stakeholders
- / Practical experience with: collibra/metacenter, AWS, Snowflake, GCP, Hadoop, DevOps/DevSecOps etc

Behaviours that will move frontiers

Imagine with intelligence

We're a data company that is doing things nobody has done before. That takes sharp and agile minds. Minds that can make the leap from the known to the unknown; that questions what's possible. Think from first principles and dare to go somewhere new.

Enjoy uncomfortable

Transforming an entire industry requires desire, energy, perseverance and a restlessness to push the boundaries of what's possible. While challenging the status quo can be scary, the results are worth it.

Be clever and concise

We move fast. To keep momentum, we need to simplify challenges into concise statements and efficient dialogues.

Apply ethics

We work in a transparent manner. If we finish a project ahead of time, we'll call time on our fees that day. In an industry used to wasting millions, it takes many clients by shock.

Be your authentic self

We don't want clones. We want knowledge-age thinking. It doesn't matter if you prefer suits or jeans, if you hold a baby or a briefcase. You'll only be the best version of yourself when you are yourself.

Science eats opinion

Apply a little science; get a different result. A better result. Find the data and run your own experiments. That's the Mudano way.

Farewell to the mundane

Mudano is a collective of unique individuals but with a common set of beliefs, behaviours and values. Culture is how we work together. Easy to experience, harder to pin down and define in words. It is inclusive and it is diverse. Our benefits and policies are designed for each person to integrate their work and life in a way that is right for them, as well as provide extensive support for career development, whatever that path may be.

Want more flexibility? Talk to us and we'll see if together we can build a better business world.
