

People & Process Questions

Executive Questions

Do you have a mission and vision which will allow you to be proactive in the market about hiring talent?

Can you distinguish between cloudops, data ops and innovation / analytics teams and the scope and purpose of their backlogs. Are we using the right team for the right job?

To what extent are you federating or centralising capability and is that a tactical or strategic choice for the business at any given time?

Does a solution have a route to scale if successful? And is a route to scale required to get the value required to warrant focus?

Are you analytics / insight teams throwing things over the fence or ensuring that there is an extended proving period to measure value?

Are teams kpid by value delivered to the business? Noting that foundational teams (cloud / data) likely have longer term value horizon than use case lab teams?
